

# The Seven Steps of Education

The world's happenings are dependent on thoughts.

- I) At first the human must seek the truth, find it, gain knowledge from it and expand on it.
- II) As second step the human must correct his thoughts in a controlling manner and align them with the truth of his gained knowledge.
- III) As third step the human must, through his knowledge and his thoughts, create his inner harmony.
- IV) As fourth step the human must, based on his inner harmony, correct, straighten out, form and harmonise his own character.
- V) As fifth step the human must correct, straighten out, form and harmonise his direct environment, his family life and relatives' life.
- VI) As sixth step the human must correct, straighten out, form and harmonise his near environment of friends, mates and acquaintances.
- VII) As seventh step the human is then capable to correct, to straighten out, to form, to harmonise and to lead a group of humans, the mass of humanity, the state and the world in a wise, humane and creational-just and law-like way.
